Thin Solid Films, *154* (1987) vii–x

Contents

METHODS OF CHARACTERIZING COATINGS AND MODIFIED SURFACES

Surface and thin film analysis techniques

Thin film microanalysis using laser ablation and laser ionization mass spectrometry 1
R. W. Odom and B. Schueler (Redwood City, CA, U.S.A.)

Factor analysis in surface spectroscopies 11
J. S. Solomon (Dayton, OH, U.S.A.)

Quantification of physical properties of thin films 21
S. S. Nandra (Murray Hill, NJ, U.S.A.), R. A. Haber, K. Hatton (Piscataway, NJ, U.S.A.) and S. Nadel (Concord, CA, U.S.A.)

Microstructural characterization techniques

Characterization of epitaxial films by grazing-incidence X-ray diffraction* . . 33
A. Segmüller (Yorktown Heights, NY, U.S.A.)

Transmission electron microscopy for the determination of the microstructure of thin films and interfaces 43
M. C. Madden (Santa Clara, CA, U.S.A.)

Phase transformation in plasma-sprayed iron oxide coatings 57
L. Parent, J. P. Dodelet (Varennes, Quebec, Canada) and S. Dallaire (Boucherville, Quebec, Canada)

The surface topography of pyrolitic carbons and of gold thin films by scanning tunneling microscopy: grain boundaries and surface defects 65
B. Marchon, S. Ferrer, D. S. Kaufman, M. Salmeron (Berkeley, CA, U.S.A.) and W. Siekhaus (Livermore, CA, U.S.A.)

Future trends of cross-sectional transmission electron microscopy for electronic and photonic devices 75
T. T. Sheng (Murray Hill, NJ, U.S.A.)

Relationship between substrate bias and microstructure in magnetron-sputtered Al–Cu films 81
T. Lin, K. Y. Ahn, J. M. E. Harper, P. B. Madakson and P. M. Fryer (Yorktown Heights, NY, U.S.A.)

* Recipient of the Bunshah Award for the best paper in its Symposium.

Cross-sectional transmission electron microscopy characterization of the interface between plasma-sprayed TiC and Inconel 91
G. Veilleux, R. G. Saint-Jacques (Varennes, Quebec, Canada) and S. Dallaire (Boucherville, Quebec, Canada)

Films of rare earth oxides formed by electron beam evaporation 101
R. O. Adams, A. Digiallonardo and C. W. Nordin (Golden, CO, U.S.A.)

Mechanical properties of films and coatings

The mechanical properties of thin films: a review 109
D. A. Hardwick (Los Alamos, NM, U.S.A.)

The interrelationship between internal stress, processing parameters and microstructure of physically vapour deposited and thermally sprayed coatings 125
D. S. Rickerby, G. Eckold, K. T. Scott and I. M. Buckley-Golder (Didcot, U.K.)

Electromechanical properties and characterization of zirconia–alumina and alumina coatings 143
N. Iwamoto, N. Umesaki, M. Kamai (Osaka, Japan) K. Marushita (Hiroshima Prefecture, Japan)

The structure–mechanical property relationship of amorphous silicon monoxide thin films 149
R. W. Hoffman, Jr., T. E. Mitchell and R. W. Hoffman (Cleveland, OH, U.S.A.)

Intrinsic stress in AlN prepared by dual-ion-beam sputtering 159
H. Windischmann (Cleveland, OH, U.S.A.)

Mechanical properties of thin films: measurements of ultramicro-indentation hardness, Young's modulus and internal stress 171
Y. Tsukamoto, H. Yamaguchi and M. Yanagisawa (Kawasaki, Japan)

Adhesion of physically vapor-deposited titanium coatings to beryllium substrates 183
A. F. Jankowski (Golden, CO, U.S.A.)

Ultramicrohardness measurements of coated samples 199
A. Wagendristel, H. Bangert, X. Cai and A. Kaminitschek (Vienna, Austria)

Non-destructive characterization techniques

Imaging and characterization of film coating using scanning acoustic microscopy 207
C. C. Lee, G. Matijasevic, X. Cheng and C. S. Tsai (Irvine, CA, U.S.A.)

Picosecond acoustics as a non-destructive tool for the characterization of very thin films 217
C. Thomsen, H. J. Maris and J. Tauc (Providence, RI, U.S.A.)

Brillouin spectroscopy of multilayer films 225
R. Zanoni, J. Bell, G. I. Stegeman and C. T. Seaton (Tucson, AZ, U.S.A.)

Raman characterization of optical thin film coatings 239
C. Y. She (Fort Collins, CO, U.S.A.)

Raman microprobe study of silicon- and germanium-on-insulator structures. 249
I. H. Campbell, P. M. Fauchet, E. H. Lee and M. A. Awal (Princeton, NJ, U.S.A.)

Raman enhancement methods for molecular structure characterization of optical thin films 257
D. M. Friedrich and G. J. Exarhos (Richland, WA, U.S.A.)

Fourier transform IR reflection techniques for characterization of polyimide films on copper substrates 271
K. Kelley, Y. Ishino and H. Ishida (Cleveland, OH, U.S.A.)

Investigation of d.c. planar-magnetron-sputtered palladium films by spectroscopic ellipsometry 281
B. T. Sullivan and R. R. Parsons (Vancouver, British Columbia, Canada)

A comparison of thickness-measuring methods 291
M. Louie (El Segundo, CA, U.S.A.) and R. Christy (Malibu, CA, U.S.A.)

Angle-dependent X-ray photoelectron spectroscopy investigation of GaAs surfaces 301
W. F. Stickle and K. D. Bomben (Mountain View, CA, U.S.A.)

TRIBOLOGICAL COATINGS AND SURFACE MODIFICATION

Reduction of friction through coatings and/or surface modifications

Fundamental aspects of the electronic structure, materials properties and lubrication performance of sputtered MoS_2 films* 309
P. D. Fleischauer (El Segundo, CA, U.S.A.)

A statistical study of the combined effects of substrate temperature, bias, annealing and a Cr_3Si_2 undercoating on the tribological properties of r.f. sputtered MoS_2 coatings 323
J. K. G. Panitz, L. E. Pope, C. R. Hills, J. E. Lyons and D. J. Staley (Albuquerque, NM, U.S.A.)

Adhesion-bonding theory and measures of coatings

Adhesion testing by the scratch test method: the influence of intrinsic and extrinsic parameters on the critical load 333
P. A. Steinmann, Y. Tardy and H. E. Hintermann (Neuchâtel, Switzerland)

* Recipient of the Bunshah Award for the best paper in its Symposium.

The effect of nitrogen content on the critical normal force in scratch testing of Ti–N films 351
J. Valli, J. M. Molarius and A. S. Korhonen (Espoo, Finland)

Adhesion measurements of chemically vapor deposited and physically vapor deposited hard coatings on WC–Co substrates 361
P. C. Jindal, D. T. Quinto and G. J. Wolfe (Greensburg, PA, U.S.A.)

TiN coatings on M2 steel produced by plasma-assisted chemical vapor deposition 377
M. R. Hilton, G. J. Vandentop, M. Salmeron and G. A. Somorjai (Berkeley, CA, U.S.A.)

Evaluation of adhesion strength of thin hard coatings 387
T. Arai, H. Fujita and M. Watanabe (Aichi-ken, Japan)

The relationship between hardness and scratch adhesion 403
P. J. Burnett and D. S. Rickerby (Didcot, U.K.)

Spalling resistance of cemented carbide with physically and chemically vapor-deposited coatings 417
D. R. Rich, A. J. Perry and P. F. Woerner (Troy, MI, U.S.A.)

The influence of the TiN deposition temperature on the critical load and hardness of hardened steels 425
M. Y. Al-Jaroudi, H. G. T. Hentzell (Linköping, Sweden) and J. Valli (Espoo, Finland)

THIN FILMS FOR MAGNETIC AND OPTICAL STORAGE APPLICATIONS

Magnetic properties of d.c. magnetron sputtered CoCr thin films 431
Z.-M. Li, J. F. Carolan, R. C. Thompson and R. R. Parsons (Vancouver, British Columbia, Canada)

Analysis of cobalt-doped iron oxide thin films by synchrotron radiation . . . 439
T. C. Huang, M. F. Toney (San Jose, CA, U.S.A.), S. Brennan and Z. Rek (Stanford, CA, U.S.A.)

The effect of ultrathin selenium overcoat on the stability of tellurium-based optical recording media 447
W. Y. Lee (San Jose, CA, U.S.A.)
